Software engineer and technical lead building dependable product interfaces, backend services, and delivery systems. Combines hands-on engineering with architecture, mentoring, frontend standards, interviewing, and Linux infrastructure automation.

EXPERIENCE

Software Engineer / Tech Lead

AlixPartners · Global / Buenos Aires

2021–Present

- Holds Tech Lead responsibilities across globally distributed teams, guiding technical direction, architecture decisions, delivery coordination, and mentoring.
- Co-leads the Frontend Guild, aligning engineering practices across Next.js, React, and Vue applications.
- Conducts technical interviews and contributes to structured candidate assessment.
- Builds internal and client-facing products with Next.js, React, Vue, C#, NestJS, SQL Server, and Azure.

Creator / Software Engineer

Agala Labs · Independent engineering

2026–Present

- Builds a reusable private product platform across Nuxt and Vue applications with shared frontend infrastructure.
- Engineers Go service gateways and PostgreSQL-backed integrations with clear operational boundaries.
- Automates Linux infrastructure and delivery with OpenTofu, Ansible, Docker, secrets tooling, and CI/CD.

Freelance Software Engineer

Self-employed · Buenos Aires

2018–2021

- Delivered medium-scale web and mobile products across Node.js, C#, Vue, and Flutter.
- Designed MongoDB and PostgreSQL data layers and operated custom Linux infrastructure on AWS.

EDUCATION

B.S. Computer Engineering

UADE — Universidad Argentina de la Empresa

2022–Present

B.S. Computer Engineering

UBA — Universidad de Buenos Aires · Five semesters completed

2019–2021

First Certificate in English — B2

Cambridge Assessment English

Dec 2018

TECHNICAL SKILLS

Frontend	TypeScript, React, Next.js, Vue, Nuxt, Flutter
Backend & data	C#, Node.js, NestJS, Go, SQL Server, PostgreSQL, MongoDB
Platform	Linux, Azure, AWS, Docker, Ansible, OpenTofu, CI/CD
