

Hands-on software engineer and technical lead spanning product interfaces, backend services, and production infrastructure. Leads multidisciplinary teams across Argentina and Europe and improves engineering quality through architecture, shared standards, automation, and mentoring.

EXPERIENCE

Technical Lead / Software Engineer

2021–Present

AlixPartners · Buenos Aires, Argentina

- Lead technical direction for multidisciplinary product teams across Argentina and Europe, turning product requirements into architecture and delivery plans while remaining hands-on in implementation and code review.
- Architect and build product systems from scratch across frontend applications, backend services, data, and Azure infrastructure.
- Co-lead the Frontend Guild and develop a shared design-system library, standardizing interface patterns and engineering practices across applications.
- Improve delivery and support workflows through automation and repeatable processes; mentor engineers and conduct structured technical interviews.

Creator / Software Engineer

2026–Present

Agala Labs · Independent engineering

- Build and operate Smaltt and Kervo, production applications for dental-practice management and retail operations.
- Architect their shared Nuxt, Go, and PostgreSQL foundation and integrations for payments, billing, messaging, object storage, and AI features.
- Own production infrastructure end to end, including Hetzner and Linux provisioning, OpenTofu, Ansible, Docker delivery, Woodpecker CI, observability, and secrets management.

Freelance Software Engineer

2018–2021

Self-employed · Buenos Aires

- Delivered web and mobile products from requirements through launch and support using Vue, Flutter, Node.js, C#, MongoDB, and PostgreSQL.
- Deployed and supported production workloads across AWS and Linux infrastructure.

EDUCATION		TECHNICAL SKILLS	
B.S. Computer Engineering UADE, Universidad Argentina de la Empresa	2022–Present	Frontend	TypeScript, React, Next.js, Vue, Nuxt, Flutter
		Backend & Data	Go, C#, Node.js, NestJS, SQL Server, PostgreSQL, MongoDB
B.S. Computer Engineering UBA, Universidad de Buenos Aires · Five semesters completed	2019–2021	Platform & Delivery	Linux, Azure, AWS, Docker, Ansible, OpenTofu, CI/CD
		LANGUAGES	
		Spanish: Native · English: Professional proficiency (Cambridge English B2, 2018)
